SUMMARY:

I am a dedicated and inquisitive Computer Science and Engineering student with a robust foundation in Data Structures, Algorithms, Operating Systems, and Frontend Development. I am adept at tackling complex problems and devising innovative solutions. My true passion lies in Computer Networks, Artificial Intelligence, and Machine Learning, and I am eager to apply my skills to cutting-edge projects and challenging environments. As a quick learner with exceptional problem-solving and analytical abilities, I thrive in fast-paced settings and continuously seek new opportunities to broaden my knowledge and grow as a professional. I am committed to keeping up with the latest technologies and advancements, and I am excited to make a significant impact in the tech industry.

SKILLS:

Languages: C, Python, SQL.

IDEs: Visual Studio Code.

Web Technologies: HTML5, CSS3, JavaScript.

Databases: SQL.

Other skills: Data Structures, and Algorithms.

Coursework: Operating systems, Computer Networks, DBMS, AI&ML.

VIRTUAL INTERNSHIPS:

AI-ML Virtual Internship

2024 July– 2024 September

Plasimid: Artificial Intelligence

2024 May - 2024 July

PROJECTS:

SOFT SKILLS DEVELOPMENT WEBSITE

2024 November

- Developed a Soft Skills Development website using HTML, CSS, and JavaScript.
- Utilized HTML for structuring and organizing content.
- Leveraged CSS for creating a visually appealing layout, styling, and animations.
- Employed JavaScript for implementing dynamic functionality and user interactions.
- Implemented responsive design principles for seamless functionality across devices and browsers.
- Created a scalable and maintainable Soft Skills development application with a rich user experience

EDUCATION:

2023-2027

Bachelor of Technology in Computer Science and Engineering at **SR University**

GPA:8.688
